CTA HY-CAP Capsules in shrink-wrapping PVC

System for preventing the internal contamination of the assembled hose up to the time of assembly, equivalent and alternative to the traditional threaded plastic plug.

Features:

Environment: Reduction of plastic waste quantities.
Material: Thermoplastic polyvinyl chloride (PVC) foil leaf.
Range: Cover of all applications with only 7 capsules diameters.
Management: Controls, documenting and reordering only 7 codes.
Heat-shrinking times around the second.
Capsule color and logo customizable, for minimum order quantity.
